Appendix 4 – Health Education Secondary stage curriculum and outcomes	16

1. Rationale

Caxton College takes its responsibility to provide relevant, effective and responsible relationships and health education (in Primary) and RSE and health education (in Secondary) to all its pupils as part of the school's personal, social, health and economic education (PSHE) curriculum very seriously. The School wants parents and pupils to feel assured that sex education will be delivered at a level appropriate to both the age and development of pupils, and that it is safe to voice opinions and concerns relating to the sex education provision.

This policy has been developed taking into account the views of parents, pupils and staff from the School to ensure that it meets the needs of our school community. The policy is available on the School website and is reviewed and approved by the Board of Directors annually.

2. Policy Aims

Through the delivery of high quality, evidence-based and age-appropriate Relationships Education (Primary) and RSE (Secondary), the School aims to help prepare pupils for the onset of puberty, give them an understanding of sexual development and the importance of health and hygiene, create a positive culture in relation to sexuality and relationships and to ensure pupils know how and when to ask for help and where to access support. By the end of their education Caxton College hopes pupils will have developed resilience and feelings of self-respect, confidence and empathy in preparation for the responsibilities and experiences of adult life.

3. Definitions

Primary: Relationships education

Relationships education is about pupils being taught different relationships including about friendships, family and the people that can help them. Respect for others is also taught in an age appropriate way with a focus on healthy relationships that pupils will encounter. This also applies to online relationships to ensure that children are safe when online and how others can use their information in a way that they may not expect.

This teaching will include different types of families that provide a nurturing environment for children, including for example single parent families, families headed by grandparents, adoptive parents and LGBT (Lesbian, Gay, Bisexual, Transsexual) parents among others. The purpose of this is to ensure that there is no stigmatisation of different families and to show people come from different backgrounds.

Secondary: Relationships and sex education (RSE)

RSE is lifelong learning about physical, sexual, moral and emotional development. It is about teaching sex, sexuality and sexual health in a way that gives pupils the confidence to make sound decisions when facing risks and other challenges. It includes teaching about friendship, commitment, the importance of caring, stable and mutually supportive relationships with another person, and how to control and understand feelings that come with being in a relationship.

RSE does not encourage early sexual experimentation. It teaches children and young people to understand human sexuality and to respect themselves and others, to build self-esteem and understand the benefits of delaying sexual activity so that they can develop safe, fulfilling and healthy sexual relationships, at the appropriate time for each individual.

RSE will outline that there are different types of committed, stable relationships, the characteristics and legal status of other types of long-term relationships, the importance of marriage as a relationship choice and why it must be freely entered into, how relationships might contribute to human happiness and their importance for raising children, as well as highlighting the roles and responsibilities of parents with respect to raising children, characteristics of successful parenting and how to judge when relationships have become unsafe as well as how to seek help or advice and report concerns about others.

4. Roles and responsibilities

Board of Directors

The Board of Directors will monitor and evaluate the impact of the policy by reviewing pupils' progress in achieving the expected educational outcomes. They will hold the Headteachers to account for the implementation of the policy.

Headteacher(Primary)/Co-Head: Pastoral (Secondary)

The School Headteacher (Primary)/Co-Head:Pastoral (Secondary), with support from their respective Senior Leadership Team, will ensure that staff are supported and up to date with policy changes. They will ensure that Relationships and Health Education (Primary) and RSE and Health Education (Secondary) are well led, effectively managed and well planned across various subjects (to avoid unnecessary duplication of topics) and that the quality of provision is subject to regular and effective self-evaluation. The Headteacher (Primary)/Co-Head:Pastoral (Secondary) will ensure that teaching is age-appropriate, delivered in ways that are accessible to all pupils with SEND and that the subjects are resourced, staffed and timetabled appropriately. They will ensure that teaching delivered by any external organisation is age-appropriate and accessible for pupils and will liaise with parents regarding any concerns or opinions regarding Relationships and Health Education Education (Primary) and RSE and Health Education (Secondary) provision and will manage parental requests for withdrawal of pupils from non-statutory, non-science components of RSE.

Staff

Teachers of Relationships and Health Education (Primary) and RSE and Health Education (Secondary) will ensure that they are up to date with school policy and curriculum requirements regarding sex education and will attend and engage in professional development training. Teachers will encourage pupils to communicate concerns regarding their social, personal and emotional development in confidence, listen to their needs and support them seriously.

Parents

Caxton expects parents to share the responsibility of sex education and support their children's personal, social and emotional development. We encourage parents to create an open home environment where pupils can engage, discuss and continue to learn about matters that have been raised through learning at school. Parents are also encouraged to seek additional support in this from the school where they feel it is needed.

Pupils

Pupils are expected to attend sex education classes that are taught as part of the Personal Development curriculum, and to take them seriously. Although they are not assessed through examination, these classes are still a very important part of the curriculum and a tool to aid personal development and the school expects pupils to recognise this.

Pupils should support one another with issues that arise through Relationships and Health Education (Primary) and RSE and Health Education (Secondary). Listening in class, being considerate of other people's feelings and beliefs. Complying with confidentiality rules that are set in class are key to effective provision. Pupils who regularly fail to follow these standards of behaviour will be dealt with under the school behaviour policy, which is available through the school website and can also be viewed via the Parent profile.

We also hope that pupils will feel comfortable to talk to a member of staff, in confidence, regarding any concerns they have in school related to relationships, sex education or otherwise.

5. Implementation and curriculum

It is important that the school implement the Relationships, Sex and Health Education policy consistently throughout the school and provide effective provision throughout classrooms. We encourage teachers to provide classes that are specific to the needs of the pupils in that class, and responsive to their behaviour and development.

Through this aspect of our curriculum we aim to explore different attitudes, values and social labels, and develop skills that will enable our pupils to make informed decisions regarding Relationships and Health Education (Primary) and RSE and Health Education (Secondary). It is important that pupils know the difference between fact, opinion and belief.

Primary

The Relationships and Health Education will be delivered during Personal, Social, Health and Emotional Education (PSHE), Physical Education, Science, Spanish and assemblies. The School understands that different pupils of the same age may develop at different stages and staff will be able to plan provision to take into account these differences. Appendix 1 sets out the themes that will be taught to pupils before the end of primary. Given the age of primary pupils, the focus of the curriculum is around relationships of pupils, with their family members, friends and online relationships.

By the end of their primary education the School expects pupils to know the information set out at Appendices 1 and 3.

Secondary

RSE will be delivered through Personal Development, Science and assemblies and will build on the foundation of the RSE delivered in primary school. By the end of secondary school the School expects pupils to know the information set out at Appendix 2.

The School wishes to promote pupils' health and well-being by encouraging self-control, their ability to self-regulate and strategies for doing so. This will enable pupils to become confident in their ability to achieve well and persevere even when they encounter setbacks or when their goals are distant, and to respond calmly and rationally to setbacks and challenges. The School believes that an integrated, whole-school approach to the teaching and promotion of health and wellbeing will have a positive impact on behaviour and academic attainment. Health Education will be delivered within Science, IT, Physical Education (PE), Career Skills and

Personal Development, as well as through Year group assemblies, whole-school campaigns and registration activities.

By the end of their secondary education the School expects pupils to know the information set out at Appendices 2 and 4

Dealing with difficult questions

Staff training will include sessions on how to respond to difficult questions. There may still be times when staff are faced with a difficult question in class that they feel uncomfortable or ill equipped to answer. In this case, they may wish to put the question to one side and seek advice from the Relationships Education Coordinator (Primary) or RSE Coordinator (Secondary) or the Headteacher/Co-Head: Pastoral.

Ground rules in class are essential when discussing sensitive subject matter. Some strategies staff may use to support this might be:

- An anonymous question box; this will enable pupils to feel more comfortable to ask questions without being identified
- Explaining that whatever is discussed in the classroom stays confidential and should not be brought up at any other time. We hope this will give pupils the sense that they are in a safe zone to speak freely.

Pupils with special educational needs

The School works hard to ensure that all aspects of the school curriculum are inclusive and support the needs of pupils of all ranges of abilities. Staff should differentiate lessons to ensure that all members of the class can access the information fully, and this is no different when it comes to RSE and Relationships and health education.

The School will use a variety of different strategies to ensure that all pupils have access to the same information. Some of these include:

- Interactive teaching methods e.g. card sorting activities
- Use of expert guest speakers
- Practical activities
- Using video
- Group and paired activities.

Withdrawal from RSE

The School hopes that parents will feel comfortable with, and understand the importance of, the education provided to their children as described in this policy.

Parents of children in Secondary school have the right to withdraw their child from sex education, which is taught in Personal Development specifically in KS4 on the topics of contraception and STIs. In the case of requests to withdraw a child from sex education in Secondary, the Co-Head: Pastoral will arrange a meeting with parents to discuss their concerns. Once those discussions have taken place, except in exceptional circumstances, the school will respect the parents' request to withdraw the child from sex education, up to and until three terms before the child turns 16. After that point, if the child wishes to receive sex education rather than be withdrawn, the school will make arrangements to provide the child with sex education during one of those terms.

Before withdrawing or making a request, the School strongly urges parents to carefully consider their decision as sex education is a vital part of the school curriculum and supports child development. Parents cannot withdraw their child from Relationships or Health Education or the elements on human growth and reproduction which fall under the National Curriculum for Science.

If a pupil is excused from sex education the school will ensure that the pupil receives appropriate, purposeful education during the period of withdrawal.

Complaints

Parents or carers who have complaints or concerns regarding the RSE curriculum should contact the school and follow the school's complaints policy.

Equal opportunities

The School has duties under the Equalities Act 2010 to ensure that pupils are not discriminated against because of their sex, race, disabilities, religion or belief, sexual orientation, gender reassignment or pregnancy or maternity. RSE and Relationships and Health Education lessons provide a good background for talking openly and freely about the diversity of personal, social and sexual preferences. Prejudiced views will be challenged, and equality promoted. Any bullying that relates to sexual behaviour or perceived sexual orientation will be dealt with swiftly and seriously. This is the case for bullying of any kind and the procedures regarding this are outlined in the school's anti-bullying policy, which can be found on the school website, or via the parent profile.

Safeguarding and confidentiality

We hope to provide a safe and supportive School community where pupils feel comfortable seeking help and guidance on anything that may be concerning them about life either at school or at home. Training around confidentiality will be provided to all teachers.

It may be the case that discussion around what is acceptable and not acceptable in relationships may lead to the disclosure of a child protection issue. If this is the case, the school's **child protection and safeguarding procedure** will be followed. This can be found on our school website, or via the Parent profile..

If a staff member is approached by a pupil under 16 who is having, or is contemplating having sexual intercourse, the member should:

- Encourage the pupil to talk to their parents or carer. Pupils may feel that they are more comfortable bringing these issues to a teacher they trust, but it is important that children and their parents have open and trusting relationships when it comes to sexual health and the school will encourage this as much as possible.
- Decide whether there is a child protection issue. This may be the case if the staff member is concerned that there is coercion or abuse involved. If a member of staff is informed that a pupil under 13 is having, or is contemplating having sexual intercourse, this will be dealt with under child protection procedures.
- Ensure that the pupil is accessing all the contraceptive and sexual health advice available and understands the risks of being sexually active.

Pupils with special educational needs may be more vulnerable to exploitation and less able to protect themselves from harmful influences. If staff are concerned that this is the case, they should seek support from the Designated Safeguarding Lead to decide what is in the best interest of the child.

6. Monitoring, review and evaluation

The educational and personal needs of our pupils develop in line with varying societal pressures. Our aim is to provide RSE and Relationships Education that is relevant and tailored to meet the needs of our pupils, depending on their age and stage of personal development. For this reason, we review the RSE or Relationships curriculum annually.

We aim to monitor the effectiveness of our sex education provision through:

- regular feedback from pupils
- annual feedback from parents
- feedback from staff
- classroom observations.

The School will review this policy annually, evaluating its effectiveness by taking into account feedback from pupils, staff and parents, as well as what has come to light through classroom observations and information we receive from national reports and curriculum reviews.

7. Support

We hope that pupils will feel safe in the school environment to talk to any member of staff in confidence about any areas of concern regarding their personal, social and emotional development, including matters raised by or relating to relationships and sex education. We promote the school ethos as one of inclusion and acceptance throughout all areas of school activity and hope that pupils respond to this by feeling comfortable to ask questions and continue their learning both in and outside of the classroom.

In Primary, in the Start of Year meeting we will provide a brief overview of the RSE curriculum for the forthcoming year. In Secondary, the Head of Personal Development will hold an online meeting to provide a brief overview of the RSE curriculum for the forthcoming school year and answer any questions that parents may have.

Additionally parents can contact our Head of Personal Development (Secondary), Primary and Secondary psychologists, or our School Nurse for one-to-one support on providing effective sex and relationships education at home. Contact can be made through the Parent profile, via email, or via the telephone.

Appendix 1 –Relationships Education Primary stage curriculum

<p>Families and people who care for me</p>	<ul style="list-style-type: none"> • that families are important for children growing up because they can give love, security and stability • the characteristics of healthy family life, commitment to each other, including in times of difficulty, protection and care for children and other family members, the importance of spending time together and sharing each other's lives • that others' families, either in school or in the wider world, sometimes look different from their family, but that they should respect those differences and know that other children's families are also characterised by love and care • that stable, caring relationships, which may be of different types, are at the heart of happy families, and are important for children's security as they grow up • that marriage represents a formal and legally recognised commitment of two people to each other which is intended to be lifelong • how to recognise if family relationships are making them feel unhappy or unsafe, and how to seek help or advice from others if needed
<p>Caring friendships</p>	<ul style="list-style-type: none"> • how important friendships are in making us feel happy and secure, and how people choose and make friends • the characteristics of friendships, including mutual respect, truthfulness, trustworthiness, loyalty, kindness, generosity, trust, sharing interests and experiences and support with problems and difficulties • that healthy friendships are positive and welcoming towards others, and do not make others feel lonely or excluded • that most friendships have ups and downs, and that these can often be worked through so that the friendship is repaired or even strengthened, and that resorting to violence is never right • how to recognise who to trust and who not to trust, how to judge when a friendship is making them feel unhappy or uncomfortable, managing conflict, how to manage these situations and how to seek help or advice from others, if needed
<p>Respectful relationships</p>	<ul style="list-style-type: none"> • the importance of respecting others, even when they are very different from them (for example, physically, in character, personality or backgrounds), or make different choices or have different preferences or beliefs • practical steps they can take in a range of different contexts to improve or support respectful relationships • the conventions of courtesy and manners • the importance of self-respect and how this links to their own happiness • that in school and in wider society they can expect to be treated with respect by others, and that in turn they should show due respect to others • about different types of bullying (including cyberbullying), the impact of bullying, responsibilities of bystanders (primarily reporting bullying to an adult) and how to get help • what a stereotype is, and how stereotypes can be unfair, negative or destructive • the importance of permission-seeking and giving in relationships with friends, peers and adults

Online relationships	<ul style="list-style-type: none"> • that people sometimes behave differently online, including by pretending to be someone they are not • that the same principles apply to online relationships as to face-to-face relationships, including the importance of respect for others online including when we are anonymous • the rules and principles for keeping safe online, how to recognise risks, harmful content and contact, and how to report them • how to critically consider their online friendships and sources of information including awareness of the risks associated with people they have never met • how information and data is shared and used online
Being safe	<ul style="list-style-type: none"> • what sorts of boundaries are appropriate in friendships with peers and others (including in a digital context) • about the concept of privacy and the implications of it for both children and adults; including that it is not always right to keep secrets if they relate to being safe • that each person's body belongs to them, and the differences between appropriate and inappropriate or unsafe physical, and other, contact • how to respond safely and appropriately to adults they may encounter (in all contexts, including online) whom they do not know • how to recognise and report feelings of being unsafe or feeling bad about any adult • how to ask for advice or help for themselves or others, and to keep trying until they are heard • how to report concerns or abuse, and the vocabulary and confidence needed to do so • where to get advice e.g. family, school and/or other sources

Sex Education

The [National] Curriculum for Science covers:

- Naming the main external parts of the human body,
- The human body as it grows from birth to old age (including puberty),
- Processes of reproduction and growth in animals and
- Reproduction in some plants.

Appendix 2 – RSE Secondary stage curriculum and outcomes

<p>Families</p>	<ul style="list-style-type: none"> • that there are different types of committed, stable relationships • how these relationships might contribute to human happiness and their importance for bringing up children • what marriage is, including their legal status – for example, that marriage carries legal rights and protections not available to couples who are cohabiting or who have married, for example, in an unregistered religious ceremony • why marriage is an important relationship choice for many couples and why it must be freely entered into • the characteristics and legal status of other types of long-term relationships • the roles and responsibilities of parents with respect to raising of children, including the characteristics of successful parenting • how to determine whether other children, adults or sources of information are trustworthy, judge when a family, friend, intimate or other relationship is unsafe (and to recognise this in others' relationships), how to seek help or advice, including reporting concerns about others, if needed
<p>Respectful relationships, including friendships</p>	<ul style="list-style-type: none"> • the characteristics of positive and healthy friendships, in all contexts including online, such as: <ul style="list-style-type: none"> - trust, respect, honesty, kindness, generosity, boundaries, privacy, consent and the management of conflict - reconciliation and ending relationships, this includes different (non-sexual) types of relationship • practical steps they can take in a range of different contexts to improve or support respectful relationships • how stereotypes, in particular stereotypes based on sex, gender, race, religion, sexual orientation or disability, can cause damage (for example, how they might normalise non-consensual behaviour or encourage prejudice) • that in school and in wider society they can expect to be treated with respect by others, and that in turn they should show due respect to others, including people in positions of authority and due tolerance of other people's beliefs • about different types of bullying (including cyberbullying), the impact of bullying, responsibilities of bystanders to report bullying and how and where to get help • that some types of behaviour within relationships are criminal, including violent behaviour and coercive control • what constitutes sexual harassment and sexual violence and why these are always unacceptable • the legal rights and responsibilities regarding equality (particularly with reference to the protected characteristics as defined in the Equality Act 2010) and that everyone is unique and equal

Online and media	<ul style="list-style-type: none"> • their rights, responsibilities and opportunities online, including that the same expectations of behaviour apply in all contexts, including online • about online risks, including that any material someone provides to another has the potential to be shared online and the difficulty of removing potentially compromising material placed online • not to provide material to others that they would not want shared further and not to share personal material which is sent to them • what to do and where to get support to report material or manage issues online • the impact of viewing harmful content • that specifically sexually explicit material, for example pornography, presents a distorted picture of sexual behaviours, can damage the way people see themselves in relation to others and negatively affect how they behave towards sexual partners • that sharing and viewing indecent images of children (including those created by children) is a criminal offence which carries severe penalties including jail • how information and data is generated, collected, shared and used online
Being safe	<ul style="list-style-type: none"> • the concepts of, and laws relating to, sexual consent, sexual exploitation, abuse, grooming, coercion, harassment, rape, and domestic abuse, and how these can affect current and future relationships • how people can actively communicate and recognise consent from others, including sexual consent, and how and when consent can be withdrawn, in all contexts, including online
Intimate and sexual relationships, including sexual health	<ul style="list-style-type: none"> • how to recognise the characteristics and positive aspects of healthy one-to-one intimate relationships, which include mutual respect, consent, loyalty, trust, shared interests and outlook, sex and friendship • that all aspects of health can be affected by choices they make in sex and relationships, positively or negatively, for example physical, emotional, mental, sexual and reproductive health and wellbeing • the facts about reproductive health, including fertility and the potential impact of lifestyle on fertility for men and women and menopause • that there are a range of strategies for identifying and managing sexual pressure, including understanding peer pressure, resisting pressure and not pressurising others • that they have a choice to delay sex or to enjoy intimacy without sex • the facts about the full range of contraceptive choices, efficacy and options available • the facts around pregnancy including miscarriage • how the different sexually transmitted infections (STIs), including HIV and AIDs, are transmitted, how risk can be reduced through safer sex (including through condom use) and the importance of and facts about testing • about the prevalence of some STIs, the impact they can have on those who contract them and key facts about treatment • how the use of alcohol and drugs can lead to risky sexual behaviour • how to get further advice, including how and where to access confidential sexual and reproductive health advice and treatment

The [National] Curriculum for Science KS3/4 covers:

- Reproduction in humans (as an example of a mammal), including the structure and function of the male and female reproductive systems, menstrual cycle (without details of hormones), gametes, fertilisation, gestation and birth, to include the effect of maternal lifestyle on the foetus through the placenta, and
- Genes and sex determination in humans.

Appendix 3 – Health Education Primary stage curriculum and outcomes

Mental wellbeing	<ul style="list-style-type: none"> • that mental wellbeing is a normal part of daily life, in the same way as physical health • that there is a normal range of emotions (e.g. happiness, sadness, anger, fear, surprise, nervousness) and scale of emotions that all humans experience in relation to different experiences and situations • how to recognise and talk about their emotions, including having a varied vocabulary of words to use when talking about their own and others' feelings • how to judge whether what they are feeling and how they are behaving is appropriate and proportionate • the benefits of physical exercise, time outdoors, community participation, voluntary and service-based activity on mental wellbeing and happiness • simple self-care techniques, including the importance of rest, time spent with friends and family and the benefits of hobbies and interests • isolation and loneliness can affect children and that it is very important for children to discuss their feelings with an adult and seek support • that bullying (including cyberbullying) has a negative and often lasting impact on mental wellbeing • where and how to seek support (including recognising the triggers for seeking support), including whom in school they should speak to if they are worried about their own or someone else's mental wellbeing or ability to control their emotions (including issues arising online) • it is common for people to experience mental ill health. For many people who do, the problems can be resolved if the right support is made available, especially if accessed early enough
Internet safety and harms	<ul style="list-style-type: none"> • that for most people the internet is an integral part of life and has many benefits • about the benefits of rationing time spent online, the risks of excessive time spent on electronic devices and the impact of positive and negative content online on their own and others' mental and physical wellbeing • how to consider the effect of their online actions on others and know how to recognise and display respectful behaviour online and the importance of keeping personal information private • why social media, some computer games and online gaming, for example, are age restricted • that the internet can also be a negative place where online abuse, trolling, bullying and harassment can take place, which can have a negative impact on mental health • how to be a discerning consumer of information online including understanding that information, including that from search engines, is ranked, selected and targeted • where and how to report concerns and get support with issues online
Physical health and fitness	<ul style="list-style-type: none"> • the characteristics and mental and physical benefits of an active lifestyle • the importance of building regular exercise into daily and weekly routines and how to achieve this; for example walking or cycling to school, a daily active mile or other forms of regular, vigorous exercise • the risks associated with an inactive lifestyle (including obesity) • how and when to seek support including which adults to speak to in school if they are worried about their health

Healthy eating	<ul style="list-style-type: none"> • what constitutes a healthy diet (including understanding calories and other nutritional content) • the principles of planning and preparing a range of healthy meals • the characteristics of a poor diet and risks associated with unhealthy eating (including, for example, obesity and tooth decay) and other behaviours (e.g. the impact of alcohol on diet or health)
Drugs, alcohol and tobacco	<ul style="list-style-type: none"> • the facts about legal and illegal harmful substances and associated risks, including smoking, alcohol use and drug-taking
Health and prevention	<ul style="list-style-type: none"> • how to recognise early signs of physical illness, such as weight loss, or unexplained changes to the body • about safe and unsafe exposure to the sun, and how to reduce the risk of sun damage, including skin cancer • the importance of sufficient good quality sleep for good health and that a lack of sleep can affect weight, mood and ability to learn • about personal hygiene and germs including bacteria, viruses, how they are spread and treated, and the importance of handwashing • the facts and science relating to allergies, immunisation and vaccination
Basic first aid	<ul style="list-style-type: none"> • how to make a clear and efficient call to emergency services if necessary • concepts of basic first-aid, for example dealing with common injuries, including head injuries
Changing adolescent body	<ul style="list-style-type: none"> • key facts about puberty and the changing adolescent body, particularly from age 9 through to age 11, including physical and emotional changes • about menstrual wellbeing including the key facts about the menstrual cycle • human reproduction

Appendix 4 – Health Education Secondary stage curriculum and outcomes

Mental wellbeing	<ul style="list-style-type: none"> • how to talk about their emotions accurately and sensitively, using appropriate vocabulary • that happiness is linked to being connected to others • how to recognise the early signs of mental wellbeing concerns • common types of mental ill health (e.g. anxiety and depression) • how to critically evaluate when something they do or are involved in has a positive or negative effect on their own or others' mental health • the benefits and importance of physical exercise, time outdoors, community participation and voluntary and service-based activities on mental wellbeing and happiness
Internet safety and harms	<ul style="list-style-type: none"> • the similarities and differences between the online world and the physical world, including: the impact of unhealthy or obsessive comparison with others online (including through setting unrealistic expectations for body image), how people may curate a specific image of their life online, over-reliance on online relationships including social media, the risks related to online gambling including the accumulation of debt, how advertising and information is targeted at them and how to be a discerning consumer of information online • how to identify harmful behaviours online (including bullying, abuse or harassment) and how to report, or find support, if they have been affected by those behaviours
Physical health and fitness	<ul style="list-style-type: none"> • the positive associations between physical activity and promotion of mental wellbeing, including as an approach to combat stress • the characteristics and evidence of what constitutes a healthy lifestyle, maintaining a healthy weight, including the links between an inactive lifestyle and ill health, including cancer and cardio-vascular ill-health • about the science relating to blood, organ and stem cell donation
Healthy eating	<ul style="list-style-type: none"> • how to maintain healthy eating and the links between a poor diet and health risks, including tooth decay and cancer
Drugs, alcohol and tobacco	<ul style="list-style-type: none"> • the facts about legal and illegal drugs and their associated risks, including the link between drug use, and the associated risks, including the link to serious mental health conditions • the law relating to the supply and possession of illegal substances • the physical and psychological risks associated with alcohol consumption and what constitutes low risk alcohol consumption in adulthood • the physical and psychological consequences of addiction, including alcohol dependency • awareness of the dangers of drugs which are prescribed but still present serious health risks • the facts about the harms from smoking tobacco (particularly the link to lung cancer), the benefits of quitting and how to access support to do so
Health and prevention	<ul style="list-style-type: none"> • about personal hygiene, germs including bacteria, viruses, how they are spread, treatment and prevention of infection, and about antibiotics • about dental health and the benefits of good oral hygiene and dental flossing, including healthy eating and regular check-ups at the dentist • (late secondary) the benefits of regular self-examination and screening • the facts and science relating to immunisation and vaccination • the importance of sufficient good quality sleep for good health and how a lack of sleep can affect weight, mood and ability to learn

Basic first aid	<ul style="list-style-type: none">• basic treatment for common injuries• life-saving skills, including how to administer CPR• the purpose of defibrillators and when one might be needed
Changing adolescent body	<ul style="list-style-type: none">• key facts about puberty, the changing adolescent body and menstrual wellbeing• the main changes which take place in males and females, and the implications for emotional and physical health
